ESSENTIAL  
EVIDENCE  
PLUS

Essential Evidence Plus is a **powerful new one-stop resource** for the evidence you need to make critical patient care decisions. This new state-of-the-art e-reference will include not only the great content, calculators, and tools that you have come to rely on, but additionally, two completely new databases—Evidence-Based Medicine Guidelines brought to you by the Finnish Medical Society plus 800 brand new topics designed to provide evidence-based answers to your most important clinical questions. Each topic is written in a concise, highly structured presentation that focuses on the needs of the clinician and includes a “strength of evidence” rating for every recommendation, a feature you won’t find in any other point-of-care reference. Summary tables and a “Bottom-line” introducing each section ensure that you get your answers quickly.

Essential Evidence Plus is packed with **great features**, offering the most complete EBM resource available...

- EBM Guidelines with 1,000 practice guidelines, 3,000+ Evidence-Graded Summaries and 950+ high quality photographs
- Daily InfoPOEMs e-mail alerts to help you stay up to date with the latest and most relevant medical literature
- 3,000+ Archived InfoPOEMs
- 2,500+ Cochrane Abstracts
- 1,300+ Guideline Summaries
- 1,500+ Commonly used ICD-9 Codes
- Weekly Podcast
- Algorithms to facilitate your patient care decision-making
- CME availability for qualified searches
- Available via the internet or PDA device

In addition Essential Evidence Plus offers over 3,000 decision support calculators, diagnostic test calculators, and history and physical test calculators—**tools you won’t find with any other comparable product!**

While there are many other content resources available, no other provides full access to the most complete, powerful and precise collection of medical evidence.
